

# HEALTHCARE PRODUCTS RANGE

*'Infection prevention and control measures aim to ensure the protection of those who might be vulnerable to acquiring an infection both in the general community and while receiving care due to health problems, in a range of settings. The basic principle of infection prevention and control is hygiene.'* (WHO)

Healthcare products that support the hygiene of Irish hospitals and clinics are as much a part of health and safety as the utensils and medicines used in patient care.

Devices like hand sanitizing units, trolleys, medical bins, soap and surgical mask dispensers, cabinets, lockers and first aid products are all essential to a hospital's hygiene control and patient protection.

Irish company Taltech manufacture Paragon Products medical hygiene supplies. Paragon Products are widely approved by Ireland's health care industry and excel in the following areas:

**Infection control** – Infection control is one of the most important aspects of product design and various steps are taken during the manufacturing process to ensure overall risk infection of each product is kept to an absolute minimum.

**Anti-Bacterial surface hygiene** - All equipment is treated with SteriTouch antibacterial protection, a range of additives which prevent harmful bacteria and mould growth on surfaces.

**Screening** – Paragon Products provide screening involving printing directly onto health care products, such as high risk and non-risk waste notices for hospital bins.

**Audit and Repairs** – Paragon Products provide an audit and repair service for healthcare bins (including those not manufactured by Taltech) Bins are repaired and replaced with a full report issued.

**Cleaning and Training** – On site training on correct usage and maintenance of healthcare products is provided for clinical staff.

# LINEN TROLLEYS

Essential for any hospital or healthcare facility, our range of linen trolleys offer choice to suit your needs and requirements. We offer single, double and triple linen trolleys that guarantee functionality and durability to any healthcare service that values sanitation. When dealing with used sheets and hospital clothing it is vital that sanitation is maintained. We understand that this is of utmost importance for all hospitals and nursing facilities. That is why the Paragon Products Linen Trolleys range comes with a SteriTouch anti bacterial finish and can be colour coded to ensure the highest level of cleanliness and sanitation possible when disposing of used fabrics. Our linen trolleys are fire retardant, shock cord fitted and manufactured from pre-coated steel, therefore guaranteeing durability and longevity. Our linen trolleys are manufactured with functionality in mind, which is why they are fitted with 4 swivel/2 lockable trolley wheels and can be fitted for a variety of linen bag types: drawstring, loose, elasticated or looped bangs.

# MEDICAL TROLLEYS

Our medical trolleys range provides high quality options for the storage of medical records, food trays or any medical equipment to all services within the healthcare sector. Our medical trolleys take into account the need for hospitals, nursing facilities or primary care specialists to maintain the highest level of storage space. That is why Paragon Products range of medical trolleys provides for mobility, storage space and durability in equal measure. We offer trolleys suited to your specifications with a choice of separate shelving options, sloped shelves for better support and movable separators on each shelf making the storage of food trays and medical records easier on you. Our range of colours and labelling options also allow for better separating and storage of your records, healthcare products and food trays. Mobility is a key feature of this range as our medical trolleys are fitted with swivel castors. We match our mobility with durability as seen with our galvanized pre-coated steel body heavy duty durable design manufactured to maintain the trolley's high quality.

# HEALTHCARE BATHROOM PRODUCTS

Welcome to the Paragon Products range of dispensers for gloves, aprons, masks and nappies. Suitable for hospitals, physicians, surgical practices or general practitioners our range of steel dispensers is designed to meet the needs of any healthcare facility. We manufacture our dispensers to suit many healthcare and medical products that are perfect for wash-rooms and healthcare units.

We at Paragon Products offer dispensers specific to many types of gloves, such as vinyl or poly gloves, and cater for those that wish to have an all-in-one dispenser for gloves, masks and aprons. We also offer apron roll dispensers and apron flat pack dispensers, giving your healthcare facility the perfect solution for accessing aprons for medical and surgical activities. Also, we combine our apron and glove dispensers with a medical mask dispensing unit, allowing you a multiple function dispenser for your healthcare supplies.
